
Molastik[®]

Binding Agent for Pellets, Cubes and Blocks Containing Molasses

DESCRIPTION:

Molastik is a binding agent designed for use with molasses in pellets, cubes and pressed blocks. When added to feeds containing molasses, *Molastik* bonds the molasses and feed particles together resulting in significantly improved binding.

BENEFITS:

Molastik turns molasses into a high inclusion pellet binder

Molastik improves pellet integrity and stability when exposed to high humidity or moisture

Molastik improves pellet hardness and reduces fines

Molastik allows more molasses to be added that can otherwise be pelleted satisfactorily

Molastik at 3-4 lb per ton and 4-5% cane molasses is a great combination

Molastik is low inclusion allowing greater flexibility in least cost feed formulation

DIRECTIONS & INCLUSION LEVELS:

Add *Molastik* in accordance with molasses level as indicated in the chart below. Add *Molastik* powder to mixing equipment containing dry ingredients to be blended. Cane molasses and *Molastik* work best together. For additional guidance, consult a Uniscope pelleting technician.

<u>Molasses Level</u>	<u>Molasses Level/Ton</u>
3.0%	2 lb
4.0%	3 lb
5.0%	3-4 lb
7.5%	4-6 lb
10.0%	5-8 lb
12.0%	6-10 lb

COLOR/APPEARANCE:

Molastik is an off-white to tan powder with a slightly anise odor.

STABILITY:

Molastik is stable for 24 months from date of manufacture.

STORAGE:

Store *Molastik* in a cool, dry place away from sunlight. Close bag after each use.

PACKAGING:

Molastik is available in 50 lb or 25 kg multi-wall, poly-lined paper bags for extended stability.
