
Super-Lube[®] ***Low Inclusion Dry Lubricant for Hard to Pellet Feeds***

DESCRIPTION:

Super-Lube is *THE ORIGINAL*, low inclusion powdered lubricant for hard to pellet feeds, that is, those with low production rates. *Super-Lube* reduces friction heat and compression in the die and is not a topical lubricant like oil so it will not interfere with mash particle binding.

Super-Lube is a powerful, low inclusion lubricant effective at levels as low as 2-4 lb per ton.

Super-Lube will allow you to either increase production rates or run at lower amperage levels.

Super-Lube will increase pellet quality when replacing oil for lubrication.

Super-Lube is environmentally friendly and safe and easy to use.

BENEFITS:

Super-Lube can increase production rates by 15-25%

Super-Lube can lower amperage

Super-Lube can replace mineral oil, vegetable oil or fat in the formula for lubrication.

Super-Lube works in pelleting or extrusion systems.

DIRECTIONS & INCLUSION LEVELS:

Add *Super-Lube* powder to premix mixer or directly to ingredients in directly into mixer with micro ingredients and mix thoroughly. Inclusion levels will vary depending on the feed formula, processing equipment/conditions, meal particle size and starch content. For additional guidance, consult a Uniscope pelleting technician.

Shrimp and Fish Feed	2 lb per ton
Swine Pre Starter Feed	2 to 4 lb per ton
High mineral Beef and Horse Concentrate	2 to 4 lb per ton
High fiber, small pellet	2 to 4 lb per ton

COLOR/APPEARANCE:

Super-Lube is brown to gold with a mild caramel odor.

STABILITY:

Super-Lube is stable for 24 months from date of manufacture. Contact Uniscope for specific information.

STORAGE:

Store *Super-Lube* in a cool, dry place away from sunlight. Close bag after each use.

PACKAGING:

Super-Lube is available in 50 lb or 25 kg barrier proof bags for extended stability.
